

SUMMARY

Fresher Full Stack Developer with knowledge of Java, Spring Boot, SQL, JDBC, and Hibernate. Interested in building web applications and backend systems. Familiar with creating responsive websites using React, HTML, CSS, and JavaScript. Good understanding of software development concepts, problem-solving, and eager to learn and grow in a professional environment

EDUCATION

Bachelor of Computer Science and Engineering 08/2022 - 05/2025
[Mahendra Institute of Technology](#)

Diploma in Electrical and Electronics Engineering 08/2019 - 05/2021
[Mahendra Polytechnic Collage](#)

CERTIFICATION

Java Full Stack [Certificate](#)
Earned a Java Full Stack Certification from JSpiders Training & Development Center. Developed technical proficiency in Core Java, J2EE, and SQL, applying industry-standard frameworks and web technologies to build full-stack applications

Web Development [Certificate](#)
Full-Stack Web Development Internship | Imagecon Built and deployed dynamic web applications, focusing on scalable architecture and seamless user experiences. Contributed to end-to-end project delivery and received formal recognition for technical contributions and successful implementation

Awards and Recognitions

3rd Place, Catch-24 Hackathon: [Link](#)
Developed a JavaScript-based Smart Mirror on Kali Linux, recognized for innovative hardware integration and UI design.
Year - 2024

india Cyber Security Summit Finalist (Top 8): [Link](#)
Selected for "File Metamorphphy" at Christ University/ARDC for excellence in security architecture.
Year - 2023

Key Achievements

- Built a Smart Mirror system using JavaScript on Kali Linux, recognized for innovative hardware integration and UI design.
- Finalist (Top 8), India Cyber Security Summit – Project File Metamorphphy selected at Christ University / ARDC for excellence in security architecture.
- Built and deployed multiple full-stack applications including a Flight Ticket Booking System (Java, Spring Boot, PostgreSQL) and Mind Sync (MERN, AI, IoT).
- Recognized during internship at Imagecon for technical contributions, scalable architecture implementation, and successful delivery of production-ready applications.

SKILLS

- JAVA
- SPRING BOOT
- HIBERNATE
- SERVLET
- JDBC
- SQL
- HTML
- CSS
- JAVA SCRIPT
- REACT
- GIT
- GIT HUB
- POSTMAN
- VS CODE
- FRAMMER
- CANVA

PROJECTS

Mind Sync [Link](#)

MERN Stack, LLMs, Pinecone, ESP32-CAM

- Engineered an ESP32-CAM wearable using LLMs for semantic visual memory recall.
- Integrated Pinecone and Hugging Face for vector-based image retrieval in a MERN stack.
- Deployed a real-time hardware-to-cloud pipeline using Ngrok and Vercel.

Flight Ticket Booking [Link](#)

Java, Spring Boot, PostgreSQL(Back end)

- Developed a backend flight booking application using Java and Spring Boot, building RESTful APIs for flight, booking, and user management.
- Designed and implemented a PostgreSQL database schema to handle reservations, seat availability, and data consistency.
- Applied clean architecture principles, including layered design, exception handling, and scalable service-based implementation.

Smart Mirror Interface

JavaScript, Kali Linux, Shell Scripting

- Developed an interactive JavaScript interface optimized for real-time display and system performance.
- Engineered custom automation scripts and utilities on Kali Linux for daily productivity updates.
- Optimized for low-latency rendering to ensure a responsive UX on Linux-based hardware.

INTERESTS

- Backend system design and RESTful API development
- Exploring new features in Java and Spring Boot
- UI/UX design with a focus on frontend performance optimization
- Learning and experimenting with new technologies and tools

LANGUAGES

- English: Intermediate
- Tamil: Native
