

SUMMARY

Motivated Software Engineer with hands-on experience developing and maintaining software applications using Java, C#, and React.js. Skilled in cross-functional collaboration, debugging complex systems, and applying software development best practices to deliver solutions that meet customer requirements. Recognized for technical excellence in national cybersecurity summits and hackathons.

EDUCATION

Bachelor of Computer Science and Engineering	08/2022 - 05/2025
Mahendra Institute of Technology	
Diploma in Electrical and Electronics Engineering	08/2019 - 05/2021
Mahendra Polytechnic College	

PROJECTS

Mind Sync: AI-Powered Smart Glasses

[Link](#)

MERN Stack, Pinecone, Hugging Face, ESP32-CAM, LLMs

- Engineered a full-stack AI wearable solution (ESP32-CAM + MERN) to autonomously capture and process real-time visual data.
- Architected an image-to-text CV/NLP pipeline using Hugging Face models (DETR, Meta-Llama) to generate structured natural language captions.
- Integrated a Pinecone vector database and a Node.js/TensorFlow.js microservice for rapid semantic search and facial recognition.
- Deployed a responsive React.js and Tailwind CSS frontend on Vercel to allow users to securely query their visual memories.

Student Management System

[Link](#)

React.js, ASP.NET Core Web API, PostgreSQL, JWT

- Architected a scalable educational portal using React.js, ASP.NET Core Web API, Clean Architecture, and CQRS.
- Designed a robust PostgreSQL database using Entity Framework Core and the Repository Pattern for complex data relationships.
- Collaborated cross-functionally to implement secure RESTful APIs (JWT auth), conducting peer code reviews to ensure adherence to coding standards.
- Optimized frontend communication using Axios and React Router, delivering a low-latency, highly responsive user interface.

Flight Ticket Booking

[Link](#)

Java, Spring Boot, PostgreSQL(Backend)

- Developed a robust flight booking backend using Java and Spring Boot, building RESTful APIs for flight and user management.
- Designed a PostgreSQL database schema to efficiently manage reservations, seat availability, and data consistency.
- Applied clean architecture and layered design, debugging and resolving issues across the service to meet customer-facing reliability requirements.

Awards and Recognitions

3rd Place, Catch-24 Hackathon (2024)

[Link](#)

- Engineered a JavaScript Smart Mirror on Kali Linux with innovative hardware/UI design.

Top 8 Finalist, India Cyber Security Summit (2023)

[Link](#)

- Selected for "File Metamorphosis" at Christ University/ARDC for security architecture excellence

SKILLS

- JAVA
- SPRING BOOT
- HIBERNATE
- SERVLET
- JDBC
- SQL
- HTML
- CSS
- JavaScript
- REACT
- GIT
- GitHub
- POSTMAN
- VS CODE
- Framer
- CANVA
- Claude

CERTIFICATION

Java Full Stack Certification | JSpiders [Link](#)

Strengthened backend and database expertise (Core Java, J2EE, SQL) to engineer robust, industry-standard full-stack solutions.

Web Development Certificate | Imagecon [Link](#)

Earned formal recognition during a full-stack internship for successfully building, architecting, and deploying dynamic web applications from end to end.

KEY ACHIEVEMENTS

- Enterprise & Full-Stack Development: Architected scalable applications including a CQRS-based Student Management System (ASP.NET Core/React) and a complete Flight Ticket Booking backend (Java/Spring Boot/PostgreSQL).
- Award-Winning Innovation: Secured 3rd Place at the Catch-24 Hackathon for a JavaScript Smart Mirror and recognized as a Top 8 Finalist at the India Cyber Security Summit for "File Metamorphosis".
- Modern Web & AI Portfolio: Built a diverse developer portfolio featuring responsive web applications and "Mind Sync," an AI-powered IoT wearable integrating the MERN stack and Hugging Face LLMs.
- Professional Impact: Earned recognition during a full-stack internship at Imagecon for technical contributions and delivering scalable, production-ready web applications.

INTERESTS

- Backend System Design & RESTful APIs
- Emerging Java & Spring Boot Technologies
- UI/UX & Frontend Performance Optimization
- Continuous Tech Exploration & Experimentation
